

SERVICE DESCRIPTION

NQM Knowledge Base

Content Management System

NQM Knowledge Base

Overview

NQM Knowledge Base provides a Content Management System (CMS) that allows organisations to document and share their knowledge as a website in a simple, secure, and elegantly presented way.

Features

- **Secure CMS:** Content is hosted using NquiringMinds award winningly secure Trusted Data Exchange (TDX) platform. Your organisation's data will only ever be accessible and editable by those with the correct permissions.
- **Modern web-design:** Using elegant Material UI interfaces, your text is rendered in a clean and presentable way, with web pages that look just as good on desktops as they do on smartphones. Customise the look of the portal once and text formats once and it will be consistent across your entire portal.
- **Flexible content creation:** Your knowledge base can group content across multiple web pages, each of which can be customised with sub-folders for grouping similar information pages.
- **Rich content rendering:** Pages are created using markdown. Allowing you to add tables, pictures, code, links, and formatted text to create rich content experiences.

- **Live editing:** Edit your articles in the fully equipped text editor, that lets you preview your changes before saving them. Your changes become live for all users as soon as you save.
- **Smart searching:** All documents are searchable both within their own page and across your entire knowledge base.

Benefits

- State-of-the-art security with TDX keeps your knowledge out of the hands of those that do not have permission to access it. Public-facing pages can be used to help you share information and documentation with clients.
- Modern responsive web design means you can trust your web pages look good on PCs and smartphones, maximising your content's accessibility.
- Content is simple to create with markdown, set the style once, then you only have to worry about the text.
- NQM Knowledge Base can be deployed as a module within your existing website, providing you with a documentation extension, or as a stand-alone platform.
- NQM Knowledge Base is a web-based documentation platform, allowing you to get your organisations information out of text documents scattered across a shared file system, and into an accessible online platform.
- As an online platform, once you make changes, they're available for all users at the same link. There's no longer any need to circulate a document every time it changes.

System Preview

Clean, modern web design

Customise the theme and look of your portal, and even include your logo. All style selections will apply automatically to your articles.

Web-based editing

Edit text and preview your article side-by-side. You can see how your page will look as you edit, so you can be confident in your finished product.

Mobile friendly

The portal responds to your screen size, so it always looks good, even on small screens. This allows you, your colleagues, and your customers to access your important information on the go.
